

Utilizing and implementation of technology in the classroom creates pathways for differentiated instruction to meet the unique needs of students as individual learners whereby it can help to create immersive and interactive learning experiences that can enhance student engagement and understanding.

The use of technology during whole-class instruction can foster student engagement for auditory and visual learners. Integrating simple technologies Power Points, educational videos or online grading systems can be difference makers in students' growth in the classroom. ICT also allows teachers to use various teaching methods to engage students and make learning more interactive and fun. Teachers are equipped fully enabling them to efficiently plan each class and utilize available resources, enhancing students' learning experience

The college provides ICT for interactive learning in the form of online courses, computer centres, Projectors, Wi-fi Connection, use of smart board and digital resources like e-books and educational websites. Students are also assigned online materials
